It is a state where you are not thinking, reflecting, judging or deciding, but are instead simply experiencing the things currently in your available experience. In many ways people are largely unaware of our present moment, & often operate on "auto-pilot" to some degree. The auto-pilot mode is our default mode of operation. Even when we find ourselves in a pleasurable quiet moment we automatically begin to daydream about others, plan/worry about the future or ruminate about the past. We miss living in the present moment because we fail to pay attention to it. Mindfulness is about waking up to the present moment & paying attention to our experience. Learning mindfulness is not difficult; however, it is difficult to remember to do it. This webinar discusses mindfulness & how to incorporate its practice into your life.
